

## Public Call for Expressions of Interest – ADRIATECH Technology Park

We invite entrepreneurs, startups, researchers, academia, and all interested partners to express their interest in using the space, equipment, and resources of the upcoming ADRIATECH Technology Park in Šibenik. Our goal is to bring together the first residents and collaborators who will work with us to build a regional hub for marine technologies and innovation.

### What do we offer?

- **1,100 m<sup>2</sup> of space in Šibenik**
- **Workshops for mechanical, electronic, and computing projects** – 4 workshops of 100 m<sup>2</sup> each, equipped with tools and basic machinery.
- **Coworking and office spaces** – desks in open space and 5 separate offices for teams.
- **Meeting room** – capacity for 10–12 people, fully equipped for presentations and business meetings.
- **Education hall** – multifunctional space for lectures, workshops, and meetups (30+ seats).

### Technologies and equipment

ADRIATECH is specialized in the development and testing of marine technologies, including:

- IoT sensors and networks for environmental and process monitoring.
- Autonomous surface systems for marine research and surveillance.
- Underwater drones and ROVs for research and monitoring.
- Camera systems and sonar technologies for visualization and autonomous navigation.
- Artificial intelligence and computer vision applied to autonomous vessels and systems.

In addition, we provide support from mentors and industry experts.

### Key advantage of ADRIATECH:

Our park has access to marine test areas located less than 20 minutes from the facility. This means that new technologies can be developed and tested within the same day – mornings in the workshop, afternoons at sea.

### Benefits of using the ADRIATECH Technology Park

- Access to unique marine test sites
- Opportunities to participate in European projects and EU funding
- Connections with academic and research institutions
- International visibility through the Innovamare innovation ecosystem
- Networking with other entrepreneurs and partners in the marine technology sector

### Who can apply?

- Startups and entrepreneurs in the field of marine technologies
- Researchers and professors interested in collaboration
- Existing companies looking to develop innovations
- International partners interested in real-world testing

### How to apply?

The call is open until **November 15, 2025**. To express interest, please send a short description of your interests and planned activities via inbox, comments, or e-mail: [info@innovamare.org](mailto:info@innovamare.org)

### What happens after applying?

After receiving applications, we will contact you to arrange an initial meeting. During the meeting, we will present collaboration opportunities in detail and review your needs and proposals.

Join us in creating ADRIATECH – the regional hub for marine technologies and innovation.

**Together, we are building the future of marine technologies!**
