What they look for

Evercurious VC is particularly interested in:

- strong scientific and technical teams;
- novel technology;
- defensible intellectual property;
- hardware/software solutions;
- ambitious European companies;
- early-stage technologies with long-term scaling potential.

The fund states that it is comfortable with pre-revenue companies, long R&D cycles and early business-model development. ([Evercurious](#))

INNOVABLUE matchmaking interest

Potential opportunities include Blue-tech companies operating at the intersection of:
hardware + software + climate + robotics + advanced technology.
