

INOVUL

SMART MOORING FOR SAFER AND MORE EFFICIENT BERTHING

THE CHALLENGE

Mooring and unmooring vessels can become difficult and risky in changing weather conditions and high waves. Traditional procedures rely heavily on manual intervention.

THE SOLUTION

INOVUL has developed a patented smart mooring system designed to automate vessel berthing and unberthing while improving safety, reliability and operational efficiency.

THE TECHNOLOGY

- Automated mooring
- Smart berthing
- Marine-resistant components
- Patented technology
- Designed for challenging weather conditions

VALIDATION & FUNDING

INOVUL's smart mooring project received **€200,000 from the Montenegro Innovation Fund in 2025**, with a total project value of €250,000. ([Fond za inovacije Crne Gore](#))

IP

International patent applications include WO2024208728A1 and WO2024201097A1. ([Inovul](#))

TARGET MARKET

Marinas | Ports | Nautical tourism | Boat owners | Commercial vessels

LOOKING FOR

Investment | Pilot marinas | Port partners | Manufacturing | Distribution
